SKILLS

LANGUAGES & FRAMEWORKS

C# / .NET .NET Core
ASP.NET MVC WebForms
Angular Entity Framework
ADO.NET jQuery C++
PHP Ruby Java (Android)

DATA

SQL Server MySQL Oracle
Sybase SQLite

CLOUD & DEVOPS

Azure AWS (S3) CI/CD
Git / GitHub SVN Kafka

PRACTICES & DOMAINS

Tech Leadership Unit Testing
NSubstitute AI Integration Twilio
Image Processing 3D Modeling

EDUCATION

Professional Systems Engineer
Universidad Cooperativa de Colombia
2000 — 2005

Microsoft .NET Developer
Universidad Jorge Tadeo Lozano
2001 — 2003

Bachelor
Colegio Bilingüe de Santa Marta
1983 — 1997

LANGUAGES

Spanish Native
English Fluent

Senior Software Engineer with over 20 years of experience designing, building and supporting enterprise applications across finance, healthcare, logistics and e-commerce. Deep expertise across the Microsoft stack (C#, .NET Core, ASP.NET, SQL Server) paired with modern front-end work in Angular and cloud delivery on Azure and AWS. Proven track record as both a hands-on engineer and a technical lead, having guided teams of up to nine developers, driven large-scale modernization efforts, and integrated emerging technologies such as AI services, computer vision and conversational messaging into production systems.

PROFESSIONAL EXPERIENCE

CI&T Nov 2024 — Apr 2026
Medellín, Colombia

CMG Financial — Clear 2 Nov 2024 — Apr 2026
Angular · .NET Core API · Windows Forms · Azure
Supported CMG Financial's flagship mortgage application, Clear 2, as part of a three-developer team. Enhanced PDF report generation, integrated AI services to draft customer-facing emails, and migrated the test suite from Moq to NSubstitute, alongside delivering a range of smaller feature improvements.

Career Break — Time with Family Jul 2024 — Nov 2024

BairesDev Aug 2022 — Jul 2024
Medellín, Colombia

Backend Tech Lead — SmartOR Aug 2023 — Jul 2024
Angular · .NET Core · SQL Server · Azure · Kafka
Led the backend for SmartOR, a platform that records surgical procedures and applies AI and stereoscopic vision to detect key milestones, working within a team of four developers, a UI/UX designer and two Scrum Masters. Owned the API concentrating all video, audio and sensor feeds, which were buffered locally (blob storage + SQLite) and synced to hosted blob storage and SQL Server during server downtime. Consumed AI-generated milestones via Kafka and surfaced them on the UI in both live and pre-recorded modes.

Senior .NET Developer — DealerRater.com Aug 2022 — Aug 2023
C# / .NET · SQL Server · Amazon Lex · Twilio
Researched and built an SMS-based solution to streamline how customers rate dealerships after a purchase. After evaluating Amazon Lex and determining it was over-scoped for a non-actionable use case, delivered a leaner solution using Twilio Flow — a guided sequence of 6–10 SMS prompts capturing ratings and written reviews.

Jalasoft Mar 2019 — Aug 2022
Medellín, Colombia

Körber One — Warehouse Solutions Jun 2020 — Aug 2022
C# / .NET · SQL Server · Windows Forms · GitHub
Supported the Körber One warehouse management suite, developing software for handheld mobile terminals used by warehouse staff. Added new terminal-prompted fields, built and extended staff workflows, and maintained code on a low-level, assembler-like platform.

LemonTech — Court Records Scrapers Dec 2019 — Jun 2020
Ruby · MySQL
Built web scrapers to aggregate publicly available court-proceeding data from a wide range of sources into a single platform. Delivered roughly 50 site-specific scrapers in six months, overcoming challenges including CAPTCHA handling.

Tech Lead — ComeToAgreement.com May 2019 — Dec 2019
PHP · MySQL
Led a team of up to nine developers on a co-parenting platform. Inherited an existing PHP codebase and delivered fixes and improvements across shared calendar, chat, alimony payments, lawyer services and other modules.

Cafeto Jun 2018 — Mar 2019
Medellín, Colombia

StorageX Application Suite — Data Dynamix Aug 2018 — Mar 2019
C++ · C# / .NET · SQL Server · Amazon S3
Developed, tested and supported the StorageX suite, including its flagship file-transfer and backup product, Data Dynamix. Progressed from QA into core development with access to the codebase and key third-party services such as Amazon S3, contributing long-overdue features to the backup system.

HR Evaluation Application Jun 2018 — Aug 2018
C# / .NET Core · SQL Server · Entity Framework
Part of a four-developer team designing an internal HR solution focused on candidates and their evaluations. Delivered the design along with database scaffolding and migrations.

Medellín, Colombia

Kestra Financial Platform

Feb 2017 — Jun 2018

[Angular](#) · [C#](#) / [.NET](#) · [jQuery](#) · [SQL Server](#)

Modernized an investment-tracking platform burdened with legacy WebForms, jQuery and Angular code — "fixing the car while driving it." Standardized the front end on Angular, optimized SQL queries and indexing for performance, and resolved security flaws including a cross-site scripting vulnerability by introducing output encoding and input validation.

Career Break — Travel, North Carolina (USA)

Jun 2016 — Sep 2016

Globant

Jan 2014 — Jun 2016

Bogotá, Colombia

American Airlines — Reservations Platform

Jan 2016 — Jun 2016

[Azure](#) · [C#](#) / [.NET](#) · [GitHub](#)

Joined the team supporting American Airlines' flight reservations platform.

Senior Software Engineer — GIRE

Apr 2015 — Jan 2016

[Azure](#) · [C#](#) / [.NET](#) · [Image Processing](#)

Resolved Android image-formatting issues for a mobile check-deposit app that used photos of checks as proof of deposit (the iOS app already worked correctly). After extensive research, settled on TIFF Group 1 — a black-and-white format well suited to scanned documents — to match the client's needs.

AURA & JMeterAnalyzer

Feb 2015 — Apr 2016

[Android JDK](#) · [SQLite](#) · [PHP](#)

Split time across two internal products: AURA, a smart-home app for automating lights and thermostats (Android/Java in Eclipse); and JMeterAnalyzer, a tool to analyze JMeter load tests. For the latter, designed an algorithm to transform a flat tabulated CSV into a hierarchy of requests with parent records and subtotals.

Support — Eltiempo.com

Jan 2015 — Feb 2015

[C#](#) / [.NET](#) · [jQuery](#) · [SQL Server](#)

Updated the Eltiempo.com homepage and optimized the loading of sponsor logos shown in a spinner, introducing lazy loading to improve responsiveness.

Support — Carnival Cruise Lines

Jan 2014 — Jan 2015

[C#](#) / [.NET](#) · [jQuery](#) · [Angular](#) · [SQL Server](#)

Maintained and extended the Carnival Cruise Lines reservation app, working primarily on the UI (jQuery and native JavaScript). Rebuilt the UI three times, largely to deliver performance improvements.

Intcomex

Sep 2008 — Dec 2013

Bogotá, Colombia

Marketing & 3D Rendering

Feb 2011 — Dec 2013

[PHP](#) · [MySQL](#) · [Maya](#) · [Photoshop](#)

Moved into the marketing team and built customer-facing tools such as a power-supply selector and seasonal campaign apps. Trained in 3D modeling and rendering, then produced high-quality product videos featuring modeled and rendered devices such as phones and tablets.

Intcomex Web Store

Feb 2009 — Feb 2011

[C#](#) / [.NET 1.1→2.0](#) · [SQL Server](#) · [SVN](#) · [CruiseControl.NET](#)

A formative project spanning a major technology transition: WebForms to MVC, SourceSafe to SVN, and the adoption of jQuery, unit testing and a first CI/CD pipeline with CruiseControl.NET. Championed MVC before it shipped with the framework — built a proof of concept porting the homepage (with multilingual support) that won leadership buy-in and launched a six-month migration, yielding a faster, more maintainable store.

Intcomex HR Database

Sep 2008 — Feb 2009

[PHP](#) · [OrangeHRM](#) · [MySQL](#) · [LDAP](#)

Researched and implemented the company's first HR system, selecting and deploying OrangeHRM on the LAMP stack and integrating it with existing LDAP infrastructure for unified login.

Informática Siglo 21

Mar 2006 — Sep 2008

Bogotá, Colombia

Ecopetrol Reports App

Aug 2008 — Sep 2008

[Crystal Reports](#) for [.NET](#) · [Oracle 9i](#) · [ASP.NET](#)

Built and adjusted on-demand Crystal Reports as part of a dedicated reporting team.

Biofilm — Plastic Production Suite

Sep 2006 — Aug 2008

[C#](#) / [.NET 1.1](#) · [ADO.NET](#) · [WinForms](#) · [ASP.NET](#) · [SQL Server](#) · [Sybase](#)

Delivered an integrated suite for a plastics manufacturer: a quota calculator estimating resources per production run, a production-management app that worked backward from the end product to compute times and resources, and an orders application — later extended with server-side image processing to support holographic film orders.

Public Insurance Web App

Mar 2006 — Sep 2006

[C#](#) / [.NET 1.1](#) · [ADO.NET](#) · [ASP.NET](#) · [SQL Server](#) · [Sybase](#)

Built the error-management and automatic-corrections modules for an insurance platform. Designed an in-house queued correction engine — storing stored-procedure calls in the database to be executed later with full change logging — a robust, maintainable solution built before queueing libraries were available in the early .NET framework.
